

Distinctively Better® Plants

We're Known for Finding and Growing the Very Best Plants!

There are so many reasons why gardeners and design professionals prefer Monrovia plants. One might be that we offer more than 2,200 varieties, many of which are improvements over existing cultivars and chosen to meet the demands of today's market conditions and trends.

But more importantly, our plants are healthier, with stronger root systems and greater resistance to pests and disease. It starts with the soil. Our 42 custom-blended, plant-specific mixes include compost made from recycled organic matter, mycorrhizae and

time-released nutrients. This ensures the health of our plants from the time they leave our nursery for more than 5,000 independent garden centers across the U.S. and Canada. Gardeners buy with confidence, knowing that Monrovia plants will flourish in their landscape.
