## The Best of Both Worlds!

Itoh Peonies are hybrids that have the best traits of both types of Peonies: the colorful and exotic flowers of tree Peonies, with the perennial growing cycle of herbaceous Peonies. Named for Toichi Itoh, the first breeder to successfully create such a hybrid, they are also known as intersectional hybrids. Itoh Peonies tend to resemble tree varieties, with a domed, vigorous growth habit and large double flowers with disease-resistant lacy, dark green foliage.

As many as 50 blooms will appear in a single season due to their ability to produce primary and secondary buds. Strong stems make them ideal as cut flowers. These beauties are prized for their intense colors, greater vigor and excellent resistance to Peony blight (*botrytis paeoniae*). Four Monrovia exclusives that are absolutely spectacular are Keiko (adored) and Yumi (beauty), Takara (treasure) and Misaka (beautiful blossom). The Japanese names reflect both the country of origin and their stunning beauty.

## Attractive as Ornamentals and Prolific Fruit-Bearing, too!

To meet consumer demand, Monrovia continues to add to its edible line with delicious new offerings with something for all climate zones and taste buds. We are pleased to partner with another outstanding breeder, Fall Creek® Farm and Nursery, to bring you three exciting selections from their new **BrazelBerries™** collection. This breeding program focuses on berry varieties that are easy to grow, with exquisite ornamental qualities and amazing fruit. Each selection has successfully passed rigorous trialing across many geographic regions and growing situations.

Tired of dealing with thorny rambling Raspberry bushes? **Raspberry Shortcake™** is a revolutionary thornless dwarf Raspberry that is well-suited for large containers. It requires no staking, no companion pollination, has sturdy upright canes and provides plenty of tasty berries. If you are looking for striking foliage color in a compact form, new **Blueberry Peach Sorbet™** is a four-season show stopper. Foliage emerges peach, turning pink, then orange and finally emerald green. Perfect as a small hedge or container plant. And despite its diminutive size, super dwarf **Blueberry Jelly Bean™** is a prolific producer of juicy fruit in mid-summer, with attractive red-tipped foliage.

# Proven Winners

## Plants that Just Scream Color – Again and Again!

The best plant breeders partner with Monrovia to bring exceptional new discoveries to market. For the past three years, Proven Winners has brought us more than 75 remarkable new introductions. Highlights this year include the exciting Bloom-A-Thon® Reblooming Azaleas. Enjoy up to five months of large blooms that first appear in April, and again in early July, continuing through fall until frost. The evergreen foliage is disease resistant, maintaining excellent color year-round. Monrovia is offering three dazzling colors – Pink, Red and White. A fourth selection, Lavender, will make its debut soon.

We love the Lo & Behold® Buddlejas and are delighted to be growing two fantastic new additions: Ice Chip Summer Lilac has pure white fragrant flowers against a backdrop of compact mounds of silvery foliage; while Lilac Chip Summer Lilac has soft, lavender-pink fragrant flowers. Each blooms continuously from summer to fall without deadheading! They each have nice compact habits and do not set seedlings.
